

# Richmond DPU: City Improvement Projects

**Job:** Green Acres Drainage Improvement Project

**Location:** 8th City Council District

## Project Introduction

The Green Acres Drainage Improvement Project addresses increased reports of issues within the existing drainage system in the neighborhood, including ponding. Within the project area, the majority of drainage infrastructure consists of swales with culverts beneath driveways and roadway intersections.

The purpose of this project is to enhance the existing infrastructure for improved public health and safety, and hydraulic performance.

The improvements, highlighted within the figure below, will take place primarily on Green Acres Avenue, Chuckatuck Avenue, Rice Road, and Bartree Road.

## Project Schedule

**Project Assignment:** July 2019 (Hazen and Sawyer)

**Survey & Preliminary Design:** August through October 2019 (H&B Survey and Accumark)

**Engineering Design:** November 2019 through 2023 (Hazen and Sawyer)

**Construction Assignment:** To Be Determined

# WHAT HAPPENS NEXT:

## Field Investigations:

Survey work has been performed by H&B Survey and Accumark to collect data for the proposed design improvements. Richmonders may notice vehicles and survey crews in the neighborhood collecting data and performing field investigations.

At times, the teams may need to access portions of private property within the project area to collect information and to determine right of way boundaries.

## Public Meetings:

Public meetings will be held to present the proposed improvements and to receive feedback. The times and locations of these public meetings will be announced as the project progresses.

## Project Duration:

The project design is anticipated to be completed in 2023.

Before construction begins, a letter will be sent to adjacent property owners to notify the neighborhood of the construction start date.
