

# Richmond DPU: City Improvement Projects

**Job:** Woodhaven Drive Drainage Improvement Project

**Location:** 8th City Council District

## Project Introduction

The Woodhaven Drive Drainage Improvement Project addresses increased reports of issues within the existing drainage system in the neighborhood, including flooding. Within the project area the majority of drainage infrastructure consists of swales with culverts beneath driveways and roadway intersections. The purpose of this project is to improve the existing infrastructure for enhanced public health and safety, and hydraulic performance.

The improvements, highlighted within the figure below, will take place primarily on Circlewood Drive, Newkirk Drive, Woodhaven Drive, Shelby Drive, Red Oak Lane, and Alberene Road.

## Project Schedule

**Project Assignment:** Spring 2020 (Hazen and Sawyer)

**Survey & Preliminary Design:** Summer 2020 (H&B Survey and Accumark)

**Engineering Design:** 2022 through 2023 (Hazen and Sawyer)

**Construction Assignment:** To Be Determined

## WHAT HAPPENS NEXT:

### Field Investigations:

Survey work has been performed by H&B Survey and Accumark to collect data for the proposed design improvements. Richmonders may notice vehicles and survey crews in the neighborhood collecting data and performing field investigations.

At times, the teams may need to access portions of private property within the project area to collect information and to determine right of way boundaries.

### Public Meeting:

A public meeting will be held to present proposed improvements and obtain feedback.

The time and location of this public meeting will be announced as the project progresses.

### Project Duration:

The design and survey is anticipated to be completed in 2022 - 2023.

The project will be advertised for construction when the design is finished.

Before construction begins, a letter will be sent to adjacent property owners to notify the neighborhood of the construction start date.
