

Richmond DPU: City Improvement Projects

Job: Kingsway Road Drainage Improvement Project

Location: Warwick Neighborhood in the 9th City Council District

Project Introduction

This project will address drainage issues with the existing infrastructure along Kingsway Road and Barlen Drive, which mainly consists of ditches and culverts. This project will enhance the neighborhood's drainage infrastructure for improved hydraulic performance and public safety.

The project area is illustrated below and generally includes Kingsway Road and Barlen Drive from Cross Road to Swanson Road, and Cross Road.

Project Schedule

Project Assignment: AMT

Survey & Preliminary Design: Survey In Progress Summer 2024 (Cardinal Civil Resources)

Engineering Design: Estimated Design Completion Late 2025 (AMT)

Construction Assignment: To Be Determined

WHAT HAPPENS NEXT:

Field Investigations:

Field investigations will occur in the Summer of 2024 to collect information about the existing drainage conditions and utilities within the project area.

Residents may see field personnel, survey crews, and vehicles within the project area collecting data, marking existing utilities, and performing field investigations.

Though most of this work will be performed within the road rights-of-way there may be instances where team members need to access portions of private property within the project area to collect survey information.

All field personnel will carry appropriate identification, wear safety equipment, and will not need to enter your home.

The information collected during surveying will be used to ensure the development of an accurate design with optimal drainage improvements.

Project Duration:

The project's design is expected to be complete by late 2025.

The project's anticipated construction timeline will be based on many factors and is difficult to estimate before the project design is finalized.

Based on projects with similar scopes, construction will likely take between 12 to 18 months to complete.

This flyer will be updated with additional information as the project progresses.

We greatly appreciate your patience as these necessary improvements are both planned and implemented.

For questions, comments, or concerns specifically about any of these projects, please contact:
