

Richmond DPU: City Improvement Projects

Job: Pear Street and Dock Street Project

Location: Pear Street and Dock Street

Project Introduction

This project brought improvements to the intersection of Pear Street and Dock Street in order to divert stormwater runoff at two separate locations.

One of the effort's upgrades collects runoff from a roadside rip-rap ditch on Pear Street into a new stormwater conveyance system with curb and gutter connected to a preexisting combined sewer manhole near the railroad track.

The second drainage improvement addressed frequent standing water along and on Dock Street by adding a new and lower section of curb and gutter on the north side of Dock Street where the Norfolk Southern Railway drains onto the City of Richmond's right-of-way.

Project Schedule

Project Assignment: April 2021 (A. Morton Thomas & Associates)

Survey & Preliminary Design: Completed April 2021 through May 2022 (A. Morton Thomas & Associates)

Engineering Design: Completed April 2021 through May 2022 (A. Morton Thomas & Associates)

Construction Assignment: Completed May 2022 through August 2022 (PB Chenault)
